

SAMPLE EDITION

Egg Price *Outlook*

17 September 2026 · 5 of 13 pages

A preview of our monthly commodity research. This sample shows public-domain market data with a portion of our analysis. The full report includes price forecasts, balance sheets and procurement advice.

INSIDE THE FULL REPORT

Namakkal egg price outlook & quarterly bands

Procurement strategy through 2027

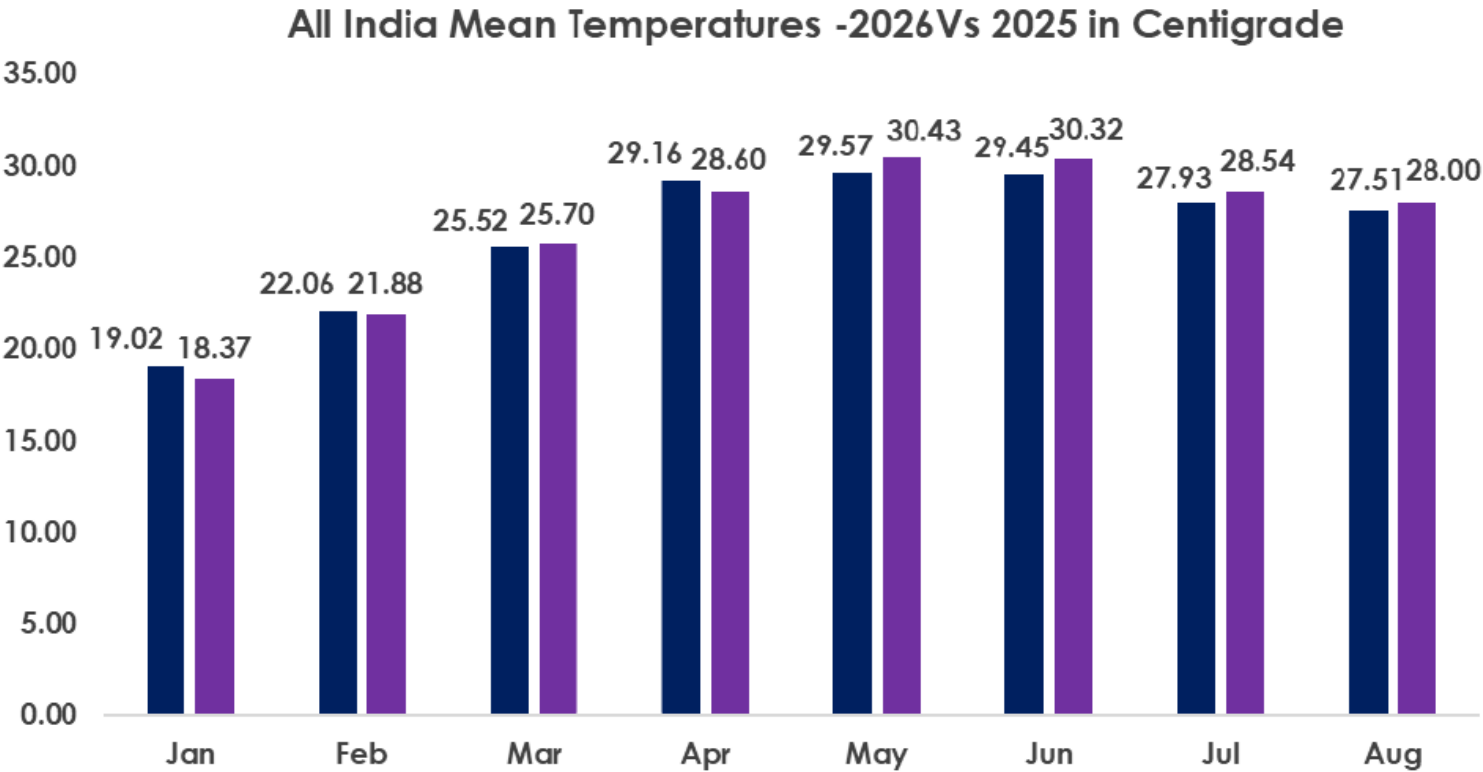

Ramadan 2027 price impact

OND and JFM seasonal price models

Export demand by destination

A warmer year could squeeze laying efficiency

Egg prices corrected about 18% between July and September 2026 on festive-season fasting and cooler weather. Temperatures have run above 2025 under El Niño, and a warmer-than-normal October–December is forecast.

All-India mean temperature, °C: 2025 vs 2026

-18%

Egg price correction, July to September 2026

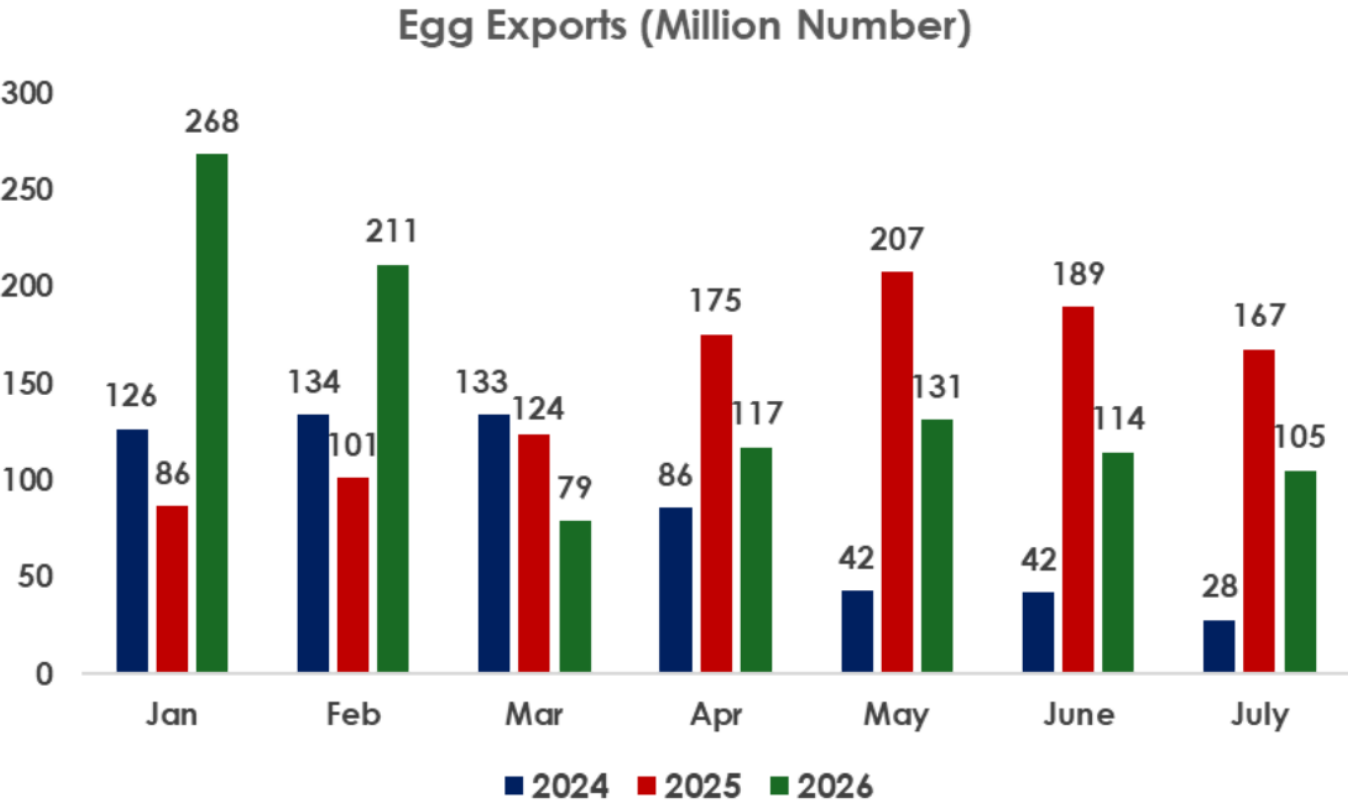

Warmer

Above-normal temperatures forecast for October–December 2026

- Heat can reduce laying efficiency and tighten supply.

Egg exports slow after a strong start to 2026

Exports recovered from their March low but eased through the summer as Middle East tensions and high prices dampened buyer interest.

Indian egg exports by month, million eggs: 2024, 2025 and 2026

105 mn

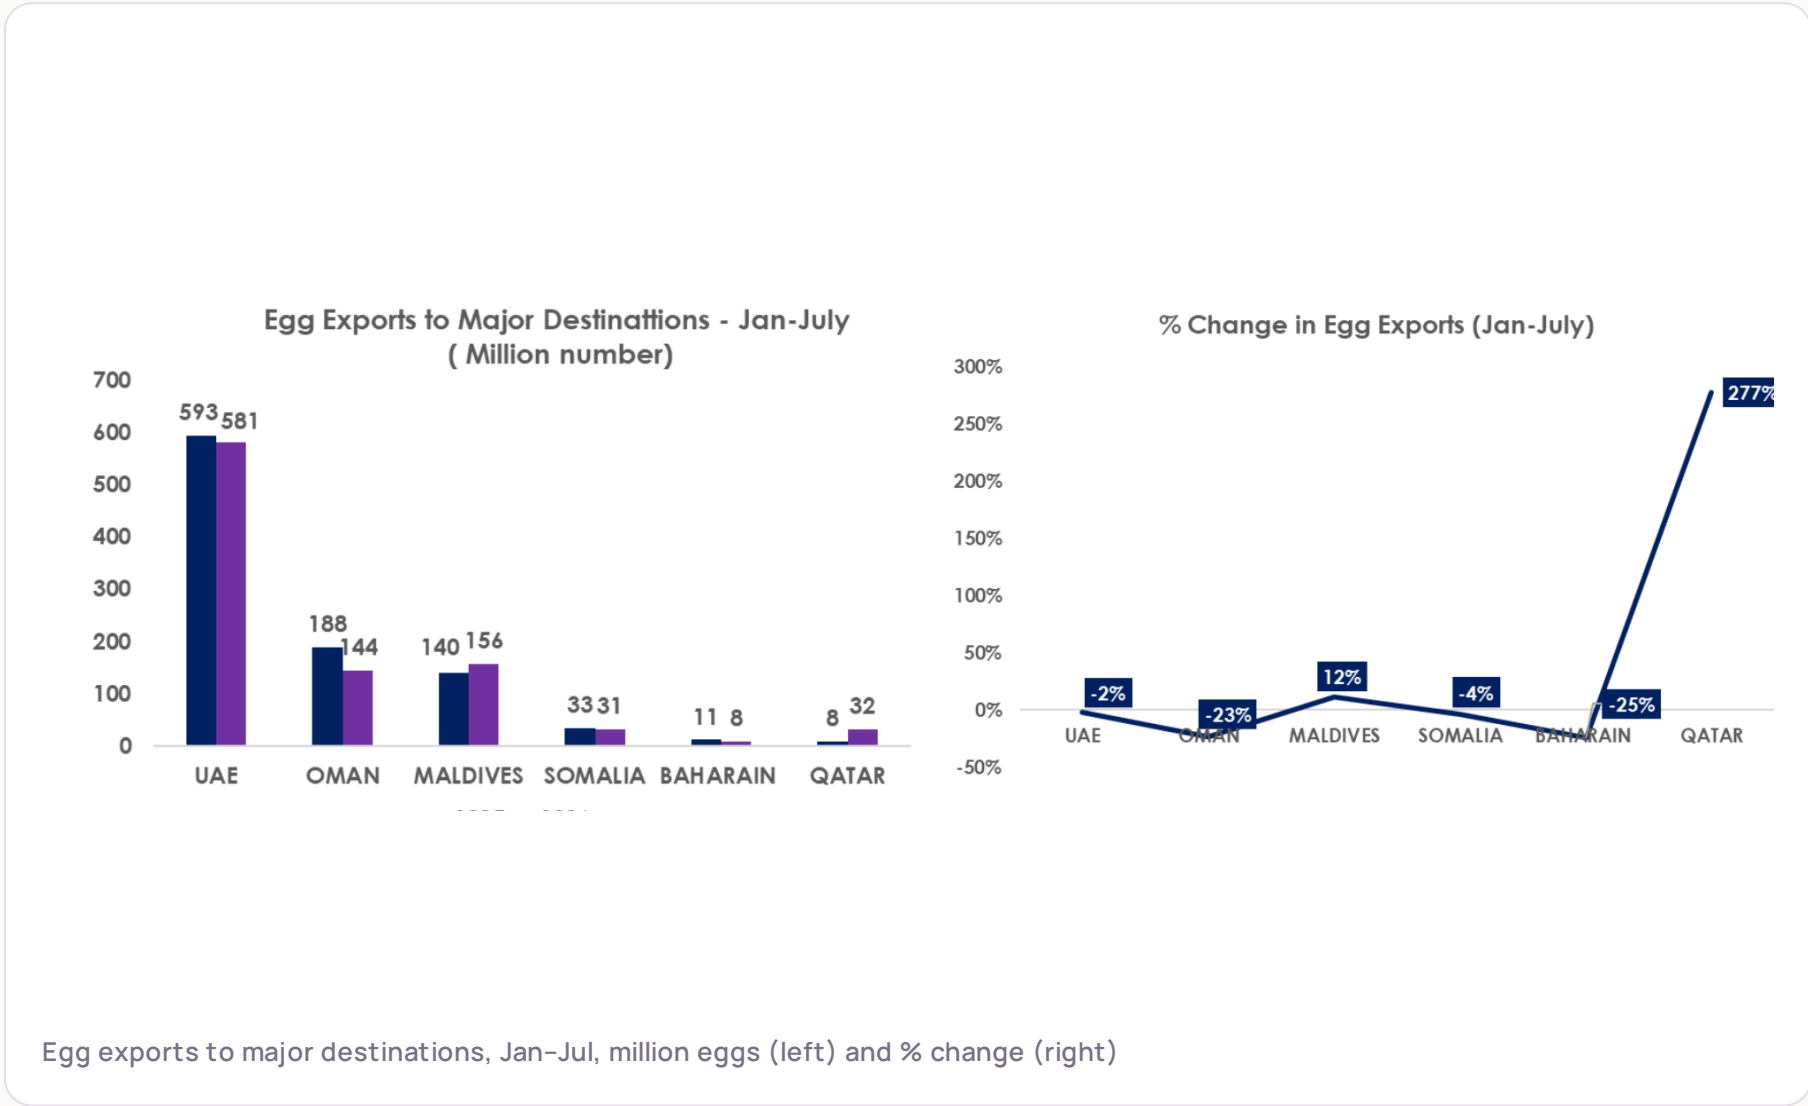

Eggs exported in July 2026: down 8% from June and 37% from July 2025

1,024 mn

Jan-Jul 2026 exports, down 2.5% from 2025

Weaker Gulf buying weighs on export demand

The UAE remains India’s largest egg buyer, but its purchases slipped in 2026. Smaller markets like Qatar grew sharply from a low base.

UAE

Largest destination: 581 mn eggs in Jan–Jul 2026 vs 593 mn in 2025

- Oman buying fell 23%.
- Maldives grew 12%.

What the full report tells you

This sample covers the public data. Our subscribers also get the forecasts, balance sheets and buying strategy built on it.

A GLIMPSE OF OUR ANALYSIS

Since 2011, average egg prices in Oct–Dec have been about **9% higher** than in Jul–Sep. Our price targets for OND'26 and the 2027 buying windows are in the full report.
